Index of Feature Material

MATERIALS & METHODS

Volume 28

July—December 1948, Inclusive

Feature editorial matter from Volume 28 of MATERIALS & METHODS covering issues from July through December 1948 is indexed here. Material covered in the index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts.

For the sake of brevity, we have omitted from the index such departmental material as Book Reviews, New Materials and Equipment, Materials Outlook, Materials at Work, Editorials, Digests, and The Last Word.

lloy Has Improved Electrical Resistance Properties, New—Aug., p. 62
luminum Alloys, Temper Designations for (File Facts)—Sept., p. 105

luminum and Its Alloys:
- Aluminum Alloys, Temper Designations for (File Facts)—Sept., p. 105
- Bearing Metals (MATERIALS & METHODS Manual)—Aug., p. 75
- Cold Welding Process, Materials Joined by New—Nov., p. 60
- Collapsible Tubes, Materials for—Dec., p. 82
- Copper-Aluminum Joints and Combination Materials Made by Upset Welding—July, p. 70
- Electroplating on Aluminum Extends Use of This Material—Oct., p. 84
- Glass Reflectors Are Made Through Vaporization of Aluminum, How—Dec., p. 85
- Induction Melting Furnace Lowers Aluminum Die Casting Cost, Two-Chamber—Sept., p. 69
- Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
- Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75
- Steel and Aluminum for Automotive Products Compared—Oct., p. 69

earing Metals (MATERIALS & METHODS Manual)—Aug., p. 75

asting and Castings:
- Casting High-Conductivity Copper Alloys, Close Control Required in—Nov., p. 69
- Die Casting, How to Save on Cost by Proper Design and Specification—Dec., p. 65
- Induction Melting Furnace Lowers Aluminum Die Casting Cost, Two-Chamber—Sept., p. 69
- Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75
- Precision Cast Stainless Steel Electrical Parts Reduce Weight, Save Costs—Sept., p. 73
- Precision Investment Castings Reduce Assembly Operations—Oct., p. 78

asting High-Conductivity Copper Alloys, Close Control Required in—Nov., p. 69

ast Iron:
- Cast Iron, Bronze Welding or Fusion Welding for Repairing—Sept., p. 74
- Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75

ast Iron, Bronze Welding or Fusion Welding for Repairing—Sept., p. 74

leaning and Finishing:
- Electroplating on Aluminum Extends Use of This Material—Oct., p. 84
- Metal Cleaning (MATERIALS & METHODS Manual)—Nov., p. 83
- Plastic Parts Are Cleaned and Finished by Tumbling—Sept., p. 83
- Sapphires Provide High Finish for Machine Parts, Synthetic—Nov., p. 79
- Shot Blasting Replaces Pickling on Some Steel Cleaning Applications—Nov., p. 72

oatings and Finishes:
- Metallizing—A Versatile Method for Production and Maintenance Work—Sept., p. 86
- Vinyl Latices Are Versatile Coatings, Unplasticized—Oct., p. 81

Cold Welding Process, Materials Joined by New—Nov., p. 60
Collapsible Tubes, Materials for—Dec., p. 82
Control of Carbon Content During Heat Treatment of Steel in Atmosphere Furnaces—Aug., p. 59
Copper-Aluminum Joints and Combination Materials Made by Upset Welding—July, p. 70
Copper-Base Alloy Hot Die Pressings, Designing—Oct., p. 89

Copper, Brass and Bronze:
- Bearing Metals (MATERIALS & METHODS Manual)—Aug., p. 75
- Casting High-Conductivity Copper Alloys, Close Control Required in—Nov., p. 69
- Copper-Aluminum Joints and Combination Materials Made by Upset Welding—July, p. 70
- Copper-Base Alloy Hot Die Pressings, Designing—Oct., p. 89
- Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
- Precision Investment Castings Reduce Assembly Operations—Oct., p. 78

Corrosion:
- Corrosion Losses of Metals, Progress Being Made in Fight Against—Aug., p. 51
- Metals for Use with Highly Corrosive Media (File Facts)—July, pp. 87, 89

Corrosion Losses of Metals, Progress Being Made in Fight Against—Aug., p. 51
Cotton Fibers as a Gear Material—Aug., p. 68
Creep Resistant Alloys, Methods of Testing—Dec., p. 76

Cutting:
- Flame Cutting of Ferrous Metals (File Facts)—Aug., p. 87

Die Casting, How to Save on Cost by Proper Design and Specification—Dec., p. 65
Electroplating on Aluminum Extends Use of This Material—Oct., p. 84

Engineering File Facts:
- Aluminum Alloys, Temper Designations for—Sept., p. 105
- Heating Materials by Infra-Red, Power Requirements for—Nov., p. 95
- Heat Resisting Alloys, Attack on Four by Various Compounds—Dec., pp. 105, 107
- Induction Heating of Cylindrical Steel Bars—Sept., p. 107
- Maximum Temperature of Stability of Various Alloys to Oxidizing Atmospheres—Nov., p. 97
- Metals for Use with Highly Corrosive Media—July, pp. 87, 89
- Nonferrous Alloys for Stampings, Including Deep-Drawn Parts, Composition and Properties of—Oct., pp. 103, 105

Fabricated Parts:
- Collapsible Tubes, Materials for—Dec., p. 82
- Copper-Base Alloy Hot Die Pressings, Designing—Oct., p. 89
- Die Casting, How to Save on Cost by Proper Design and Specification—Dec., p. 65
- Metal Powder Parts Replace Those Produced by Other Methods—Nov., p. 64
- Nonferrous Alloys for Stampings, Including Deep-Drawn Parts, Composition and Properties of (File Facts)—Oct., pp. 103, 105
- Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75
- Precision Cast Materials, Heat Treating Used to Vary Properties of—Dec., p. 72
- Precision Cast Stainless Steel Electrical Parts Reduce Weight, Save Costs—Sept., p. 73

Flame Cutting of Ferrous Metals (File Facts)—Aug., p. 87

Forging and Forming:
- Copper-Base Alloy Hot Die Pressings, Designing—Oct., p. 89
- Heating Metals by Induction and High-Speed Gas Methods—July, p. 55
- Stainless Steel Tank Heads Fabricated by Spinning Large—Aug., p. 56

Free Cutting Steels (MATERIALS & METHODS Manual)—Oct., p. 95
Glass Reflectors Are Made Through Vaporization of Aluminum, How—Dec., p. 85

Heating and Heat Treatment:
- Control of Carbon Content During Heat Treatment of Steel in Atmosphere Furnaces—Aug., p. 59
- Heating Materials by Infra-Red, Power Requirements for (File Facts)—Nov., p. 95
- Heating Metals by Induction and High-Speed Gas Methods—July, p. 55
- Induction Heating of Cylindrical Steel Bars (File Facts)—Sept., p. 107
- Induction Melting Furnace Lowers Aluminum Die Casting Cost, Two-Chamber—Sept., p. 69
- Precision Cast Materials, Heat Treating Used to Vary Properties of—Dec., p. 72
- Vertical Furnaces Reduce Labor Costs 20% in Treating High-Speed Broaches—Sept., p. 77

Heating Materials by Infra-Red, Power Requirements for (File Facts)—Nov., p. 95
Heating Metals by Induction and High-Speed Gas Methods—July, p. 55
Heat Resisting Alloys, Attack on Four by Various Compounds (File Facts)—Dec., pp. 105, 107
Induction Heating of Cylindrical Steel Bars (File Facts)—Sept., p. 107
Induction Melting Furnace Lowers Aluminum Die Casting Cost, Two-Chamber—Sept., p. 69

Machining and Grinding:
- Free Cutting Steels (MATERIALS & METHODS Manual)—Oct., p. 95
- Sapphires Provide High Finish for Machine Parts—Nov., p. 79

Magnesium:
- Magnesium Alloys Offer Superior Properties, New—July, p. 66
- Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
- Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75

Magnesium Alloys Offer Superior Properties, New—July, p. 66

Manuals, MATERIALS & METHODS:
Bearing Metals—Aug., p. 75
Free Cutting Steels—Oct., p. 95
Mechanical Tubing as an Engineering Material—Dec., p. 91
Metal Cleaning—Nov., p. 83
Permanent Mold Castings—July, p. 75
Selection and Application of Plastics—Sept., p. 91

Maximum Temperature of Stability of Various Alloys to Oxidizing Atmospheres (File Facts)—Nov., p. 97
Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
Metals for Use with Highly Corrosive Media (File Facts)—July, pp. 87, 89
Metallizing—A Versatile Method for Production and Maintenance Work—Sept., p. 86
Metal Cleaning (MATERIALS & METHODS Manual)—Nov., p. 83
Metal Powder Parts Replace Those Produced by Other Methods—Nov., p. 64

Nickel and Its Alloys:
Alloy Has Improved Electrical Resistance Properties, New—Aug., p. 62
Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91

Noble Metals Find Increasingly Wide Use in Industry, The—Nov., p. 55
Nonferrous Alloys for Stampings, Including Deep-Drawn Parts, Composition and Properties of (File Facts)—Oct., pp. 103, 105

Nonferrous Metals:
Alloy Has Improved Electrical Resistance Properties, New—Aug., p. 62
Bearing Metals (MATERIALS & METHODS Manual)—Aug., p. 75
Collapsible Tubes, Materials for—Dec., p. 82
Maximum Temperature of Stability of Various Alloys to Oxidizing Atmospheres (File Facts)—Nov., p. 97
Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
Nonferrous Alloys for Stampings, Including Deep-Drawn Parts, Composition and Properties of (File Facts)—Oct., pp. 103, 105
Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75
Precision Cast Materials, Heat Treating Used to Vary Properties of—Dec., p. 72
Step Brazing Methods, Dissimilar Metals Joined by—Aug., p. 64

Nonmetallic Materials:
Cotton Fibers as a Gear Material—Aug., p. 68
Glass Reflectors Are Made Through Vaporization of Aluminum, How—Dec., p. 85
Pure Oxide Refractories Withstand High Temperatures—Dec., p. 79
Rubber, Electrically-Conductive—July, p. 60
Sapphires Provide High Finish for Machine Parts, Synthetic—Nov., p. 79
Steel and Rubber for Aircraft Propellers—Sept., p. 66
Vinyl Latices Are Versatile Coatings, Unplasticized—Oct., p. 81

Permanent Mold Castings (MATERIALS & METHODS Manual)—July, p. 75
Plastic Parts Are Cleaned and Finished by Tumbling—Sept., p. 83

Plastics:
Plastic Parts Are Cleaned and Finished by Tumbling—Sept., p. 83
Plastics, Better Supply and Price Situation Forecasts Increased Use of—Sept., p. 61
Plastics Offer Wide Range of Properties and Fabricating Characteristics, New—Nov., p. 76
Selection and Application of Plastics (MATERIALS & METHODS Manual)—Sept., p. 91

Plastics, Better Supply and Price Situation Forecasts Increased Use of—Sept., p. 61
Plastics Offer Wide Range of Properties and Fabricating Characteristics—Nov., p. 76

Powder Metallurgy:
Metal Powder Parts Replace Those Produced by Other Methods—Nov., p. 64

Precision Cast Materials, Heat Treating Used to Vary Properties of—Dec., p. 72
Precision Cast Stainless Steel Electrical Parts Reduce Weight, Save Costs—Sept., p. 73
Precision Investment Castings Reduce Assembly Operations—Oct., p. 78
Pure Oxide Refractories Withstand High Temperatures—Dec., p. 79
Rubber, Electrically-Conductive—July, p. 60
Sapphires Provide High Finish for Machine Parts, Synthetic—Nov., p. 79
Selection and Application of Plastics (MATERIALS & METHODS Manual)—Sept., p. 91
Shot Blasting Replaces Pickling on Some Steel Cleaning Applications—Nov., p. 72
Stainless Steel Tank Heads Fabricated by Spinning, Large—Aug., p. 56

Steel:
Control of Carbon Content During Heat Treatment of Steel in Atmosphere Furnaces—Aug., p. 59
Creep Resistant Alloys, Methods of Testing—Dec., p. 76
Flame Cutting of Ferrous Metals (File Facts)—Aug., p. 87
Free Cutting Steels (MATERIALS & METHODS Manual)—Oct., p. 95
Induction Heating of Cylindrical Steel Bars (File Facts)—Sept., p. 107
Mechanical Tubing as an Engineering Material (MATERIALS & METHODS Manual)—Dec., p. 91
Precision Cast Materials, Heat Treating Used to Vary Properties of—Dec., p. 72
Precision Cast Stainless Steel Electrical Parts Reduce Weight, Save Costs—Sept., p. 73
Shot Blasting Replaces Pickling on Some Steel Cleaning Applications—Nov., p. 72
Stainless Steel Tank Heads Fabricated by Spinning, Large—Aug., p. 56
Steel and Aluminum for Automotive Products Compared—Oct., p. 69
Steel and Rubber for Aircraft Propellers—Sept., p. 66
Steel Basing Point System, Elimination Would Have Varying Effect on Consuming Industries—July, p. 51
Step Brazing Methods, Dissimilar Metals Joined by—Aug., p. 64
Vertical Furnaces Reduce Labor Costs 20% in Treating High-Speed Broaches—Sept., p. 77

Steel and Aluminum for Automotive Products Compared—Oct., p. 69
Steel and Rubber for Aircraft Propellers—Sept., p. 66
Steel Basing Point System, Elimination Would Have Varying Effect on Consuming Industries—July, p. 51
Step Brazing Methods, Dissimilar Metals Joined by—Aug., p. 64
Surface Finish Improves Quality, Cuts Cost, Control of—Oct., p. 74

Testing and Inspection:
Creep Resistant Alloys, Methods of Testing—Dec., p. 76
Surface Finish Improves Quality, Cuts Cost, Control of—Oct., p. 74

Vertical Furnaces Reduce Labor Costs 20% in Treating High-Speed Broaches—Sept., p. 77
Vinyl Latices Are Versatile Coatings, Unplasticized—Oct., p. 81

Welding and Joining:
Cast Iron, Bronze Welding or Fusion Welding for Repairing—Sept., p. 74
Cold Welding Process, Materials Joined by New—Nov., p. 60
Copper-Aluminum Joints and Combination Materials Made by Upset Welding—July, p. 70
Heating Metals by Induction and High-Speed Gas Methods—July, p. 55
Step Brazing Methods, Dissimilar Methods Joined by—Aug., p. 64

Wooden Dowels Solve Fixturing Problem in Brazing Steel Laminations—July, p. 74

METAL FABRICATOR CUTS COSTS 67 PER CENT —CAN YOU?

G.E.'s money-saving pack of facts: *manual — movie —review booklets.*

Get these facts to your key men and see how much you can save

- **WITH ARC WELDING, a fabricator cut costs on one large metal part by 67%.**
- **WITH ARC WELDING, a truck builder slashed production on dump trailer bodies to an unprecedented 15 hours.**

In *your* plant, too, savings like these in time and money are possible—when your key personnel *know* the up-to-the-minute facts on arc welding—*know* how to put them to work on your problems. And it's so easy to get the facts to them *now*—at no cost to you!

***FREE* to business management**

Examine the General Electric *Electric Arc Welding Manual* free of charge. It covers every phase of arc welding from a list of welding services for the user to specific examples of production feats in plants like yours. It provides *up-to-date* data about available equipment, power supply requirements, design and safety measures. It's written by experts, *without sales bias*, in a language your men can easily understand. Look through it. Satisfy yourself that it will pay off in your plant, then—

Get a *FREE* showing of the film

Your key personnel will enjoy learning the newest facts on arc welding in this modern, absorbing, *visual* way. Here's a thirty-minute General Electric sound film in full color that wallops across its ideas—actually *shows* you precisely how arc welding is building better products cheaper in plants like yours. It's prepared by arc-welding specialists in terms that are grasped readily. Show it to your key men and—

Get *FREE* review booklets

They're ideal for individual study and review. Have as many as you like, but—

ACT NOW! Don't delay. Remember—today's arc welding offers you unprecedented opportunities to cut costs, improve quality, lick difficult production problems. So start the ball rolling by filling in the coupon below, and we'll rush you a copy of the G-E *Electric Arc Welding Manual*. Do it *now!*

FREE TO BUSINESS MANAGEMENT

Attach to your business letterhead

Box car builder saves $2925 a day —CAN YOU?

General Electric's money-saving pack of facts: *manual—film—review booklets.*

Get these facts to your key men and see how much you can save

- **WITH RESISTANCE WELDING, a box car builder cut costs by $2925.**
- **WITH RESISTANCE WELDING, a small transformer manufacturer saved $84,000 per year.**
- **WITH RESISTANCE WELDING, a radio tube maker stepped production up to an *unprecedented* 2,500 per day.**

In your plant, too, savings and production feats like these are possible—when your key personnel *know* the up-to-the-minute facts on resistance welding—*know* how to put them to work on your problems. And it's so easy to get the facts to them *now*—at no cost.

***FREE* to business management**

Examine the General Electric *Resistance Welding Manual* free of charge. It covers every phase of resistance welding from a glossary of welding terms to specific industrial applications in plants like yours. It tells *where* resistance welding **can be used—*how* it can be used—exactly *what*** benefits you can expect from it. It's written by experts, *without sales bias*, in a language your men can easily understand. Look through it. Satisfy yourself that it will pay off.

Get a *FREE* showing of the film

Your key personnel will get a kick learning the newest facts about resistance welding in this modern, absorbing, *visual* way. Here's a General Electric sound film in full color that wallops across its ideas — actually *shows* you how resistance welding is building better products for less in plants like yours. It's prepared by resistance-welding specialists in terms that are grasped readily. Show it to your key men.

ACT NOW! Don't delay. Remember — resistance welding saves you money in *five* ways—and does a better job, too. So start the ball rolling by filling in the coupon below and we'll rush you a copy of the G-E *Resistance Welding Manual. And*, with it, we'll tell you how to arrange for a free showing of the film.
